## Acknowledgement

This final survey report of “Perspective Mapping of Livable City Concept” is the outcome of a survey carried out by Lumanti Support Group for Shelter in three municipalities during October-November 2021. The three municipalities are Kalaiya, Sundar Haraicha and Khairehni. Lumanti has been implementing various program in these three cities. The need of this study generated from the series of interactions with the communities and other city stakeholders to contribute in development of the city incorporating physical and non-physical aspects of infrastructure such as human resource development, conservation of ecology and gender dimensions. As a result, the city we live in truly becomes a livable city.

Our consultant for this study, the team from BATAS Foundation headed by Mr. Nirmal Bhandari has put tremendous effort in the study by conducting various meetings, visiting the communities and preparation of the report. Our special thanks go to the study team from BATAS Foundation. We would also like to express our deep gratitude to all the community leaders who have provided their valuable time and insights at all stages of the study. We are also thankful to the key informants who have helped us to connect with the past and present scenario of the cities.

Similarly, we are grateful to the Mayors/Deputy Mayors, Ward Chairpersons, elected representatives, Chief Executive Officers and municipality officials for their time, interest and valuable input to the study. We appreciate and would like to thank the CSO representatives, journalists, child and youth network members and members of different community groups/committees for their engagement and contribution in the meetings and workshop. Lastly, we also appreciate our Senior Manager Mr. Mahendra Shakya, Documentation and Information Management Coordinator Mr. Ananta Raj Bajracharya along with our Field Coordinators Mr. Singha Lama, Ms. Laxmi Rai, Mr. Abdul Kaish and entire field team members for their contribution in completing this study.

Lajana Manandhar  
Executive Director

## Executive Summary:

Lumanti conducted a field survey along with municipality level workshops in Kalaiya (Bara), Khairhani (Chitwan) and Sundarharaicha (Morang) during October-November 2021 as a part of perspective mapping process to implement the concept of Livable City in these municipalities in future.

The main objectives of the survey were to:

- Develop understanding on the concept of Livable City in the local context
- Identify and prioritize aspects of Livable City for implementation in the next 3-5 years
- Strengthen partnership and implement action plan to make the cities livable

The key findings of the survey are as follows:

**Kalaiya: (Bara) - Key Findings:** The sub-metropolitan city has high commitment towards making their city liveable for everyone. For it, Lumanti has been successful to bring all the stakeholders in a single forum to make the city a better place for living irrespective of their political, social or economic differences. Deepsikha Women Cooperative, with share membership of 1080 women and 350 children as saving members, is led by a woman from Dalit community and has played a vital role in socio-economic development of women. It has also given the message of inclusiveness to the society that if given the opportunity, every person has the inherent capacity to reach the highest level of excellence in any field. There are tremendous opportunities for on-farm and off-farm income generation to create employment opportunities for youths so that they do not have to go abroad mostly for labour borrowing money with a very high rate of compounding interest. On the other hand, there are challenges like traditional ways of farming with very low productivity contributing to low wage, high level of youth unemployment and social problems related to youths, low participation of people in annual planning process of the government, gender based violence, feeling of insecurity among girls and women to get out of home during the night, child marriage and increasing dowry system, lack of disability/children/senior friendly public infra-structures, high risk of traffic related fatalities, proper management of household wastes, etc. Therefore, there is urgent need for the municipality to work on a long-term plan to make the city liveable for everyone.

**Khairhani (Chitwan) - Key Findings:** The results of the study highlighted the need for some basic facilities and services including economic developments, physical infrastructure development, enhance access to services, improve quality of life, and promote environmental sustainability. Considering negative effects of growing industries on adjoining human settlements and natural resources, there is urgent need for to act on achieving collective vision for making the municipality livable for present and future generations too. The study suggests Khairahani municipality develop Livable City master plan to initiate in a systematic way and integrate the livable city plans in the regular municipality annual planning process and track progress overtime.

**Sundarharaicha (Morang) - Key Findings:** The study found that there is great scope and enthusiasm in key stakeholders to make Sundarharaicha a more livable city for everyone. Interactions with different groups, individuals and “Municipality” level workshop has been able to initiate and ignite the dialogue of Livable City to take it into action. Lumanti has been able to make a very good impact in the lives of women, children, youths and people in general in the most marginalized settlements of the municipality. Furthermore, Lumanti has been able to implement its program in close coordination and resource leveraging from local government. On the other hand, with rapid growth of migration from within the municipality and other parts of the country, there are challenges to manage growing unorganized

settlements without basic facilities like drinking water, proper drainage, waste management, open spaces of entertainment for different age groups, for children, youths, senior citizens to meet or socialize themselves.

The results of the study highlighted the need for some basic facilities and services including the economic developments, physical infrastructure development, enhance access to services, improve quality of life, and promote environmental sustainability. In conclusion, the study suggests Sundarharaicha Municipality to develop Livable City master plan to initiate in a systematic way to integrate the livable city plans in regular municipality planning process and track progress overtime. Similarly, the study suggests to align Lumanti program activities with the Livable City master plan. It would be helpful to share this report with all stakeholders of Sundarharaicha Municipality and to have discussions on the findings to develop strategic plan in line with the vision and spirit of Livability City concept. Therefore, it is high time that Lumanti works closely with “Municipality” to develop a master plan of Liveable City with clearer indicators, roles, targets and stakeholder/resource mapping.

## Background

Lumanti, a national NGO, has been implementing integrated programs in Kalaiya for nearly a decade, while it has been working in Sundarharaicha since the last 4 years and Khairhani since the last one year focusing mainly on sustainable housing, WASH, economic empowerment of women and mobilization of youths and children. Before phasing out from the working area, Lumanti wants to see a good, safe and secured living conditions of the poor people, men, women and children where there are opportunities for livelihood, better housing, access to WASH and basic facilities (health), resilience and access of people from all walks of life in decision making process to make the city livable.

The partnership between LUMANTI and MISEREOR-KZE, with a noble objective to improve the living condition of the urban poor communities in the targeted region, began in the year 2005. The program which was initiated ten years back in Dharan, Bharatpur and Birgunj is now being implemented in sixth phase in Sundar Haraicha (Morang), Khairahani (Chitwan) and Kalaiya (Bara). The sixth phase of the program was begun from Dec 2020 and will last till Nov 2023. With the encouraging and effective participation of the community people and harmonious partnership with the local government for the development of the targeted urban poor communities, the program with the title **Enabling Communities for Socio-economic Transformation (ECST) adopting People led Development** is under implementation in Sundarharaicha, Khairahani and Kalaiya covering total of 20805 people of 3717 households. The program is under implementation adopting People Led Development Process (PLDP) approach. All the activities are planned by the community people with active participation of local women, children, community user groups and community-based organizations on the basis of their needs and requirements through series of meetings and discussions. Lumanti, as the facilitator for social transformation of the communities, has been supporting the people to have access to services from the local services providers like Municipalities and also supporting the community financially and technically if demanded by the community. The Local Government (Municipality), Community Federations and CBOs based in the communities are actively involved in the progress monitoring. On the basis of monitoring, the Municipality decides to provide necessary moral and financial support accessing the need of community.

**Kalaiya Sub-Metropolitan City**, which was established in 2039 B.S., has a total area of 108.94 square km with 27 wards. The Municipality lies north to south adjoined with 5 other “Municipalities” and shares open border with India in the southernmost part of the “Municipality”. The Municipality is 12 k.m. east from one of the key business centres of Nepal, Birgunj City, and 306 km south east of Kathmandu. The historical town of Simraungaud is 26 km away from Kaliya which was established by Karnat King, Nanyadev, back in 1097 A.D. as a fortified city. Famous Barewa Darbar is situated in Kalaiya. There is communal harmony among people of different faiths and ethnicity in the Municipality with largest population of the Hindus followed by the second largest population of the Muslims which stands at 20.44%. The total population of “Municipality” is 123,659 (M-51.74% and F-48.26%) where there are 18,689 households. The population density is quite high with 1135 persons per square km.

**Khairhani Municipality** in Chitwan under Bagmati Province is about 18 km from Bharatpur, the district headquarters of Chitwan, which is situated in the east of Bharatpur city. It was established as the concept of small rural market, but after the construction of this east-west highway, rapid urbanization is taking place in this municipality. It is situated about 190 m above the sea level. It is adjoined on the north by Shaktikhor and Siddhi, on the east by Birendranagar, on the west by Bhandara, and on the south by Chitwan National Park. The Budhi Rapti River separates Khairhani as a natural boundary to the south. This municipality is very suitable for agriculture due to the fertile soil brought regularly by the Rapti River and its tributaries. On political grounds, the town has been divided into 13 wards to provide administrative services to the local people. In addition, the municipality has occupied an area of 85.57 Sq. Km. The total number of households in this municipality is 12,983 and the total population is 66,629.

**Sundarharaicha Municipality** of Morang District in province # 1 is a fast growing town with flourishing business activities. According to 2011 Census conducted by Central Bureau of Statistics (CBS), Sundarharaicha had total population of 80,518 in 18,610 households. The municipality was formed merging two former municipalities Sundar Dulari and Koshi Haraicha. The municipality consists of forest areas in the northern part, wetlands, fertile agriculture land and more than a dozen of natural lakes. Two rivers, Budhiganga and Gachiya, which flow through this municipality have been the main sources for irrigation of agricultural land and revenue generation for municipality. However, there is growing concern among the inhabitants along the banks of these rivers that excessive excavation in these rivers for construction materials like sand, grits and stones, have created high risks to the settlements, especially during monsoon and torrential rains. There is high level of internal and external migration in most part of the municipality due to a very favorable climatic condition for living as compared to other emerging towns in Terai region of Nepal. This is not confined to emerging townships along the East-West Highway but also in rural areas of the municipality with growing number of settlements due to linkage of motorable roads to East-West highway. Purwanchal University, which is situated in the middle of the municipality, has also contributed to rapid urban growth around the area.

## Overview of Livable City:

**Concept of Livability:** “Livability” is a broad term with no precise or universally agreed upon definition. The concept embraces similar ideas such as sustainability, quality of life, the “character” of place, and the health of communities. The idea of livability includes the ability of a community to meet “the needs of the present without compromising the ability of future generations to meet their own needs” (World Commission on Environment and Development, 1987).

Livability encompasses broad human needs ranging from food and basic security to beauty, cultural expression, and a sense of belonging to a community or a place. It is related with the quality of life of a city which might refer to a citizen’s satisfaction with residential environments, traffic, crime rate, employment opportunities. Alternatively, the phrase might refer to fewer tangible qualities such as freedom of expression and social justice. Together, the concepts of sustainability and livability help us to consider the quality of life for all members of a community or residents of a place, and how the activities and choices of these individuals will impact on the lives of future generations.

The idea of livability refers to the satisfaction of residents by meeting their economic, social, and cultural needs, promoting their health and well-being, and protecting natural resources and ecosystem functions.

As urbanization as well as economy grow, rapid growth typically generates additional traffic congestion, land price escalation, rising consumption of goods and services, and the loss of farmland and natural areas to urban expansion.

In sum, livability is complex multifaceted concept. It is also a highly relative term: what would be considered a livable community in one part of the world might be deemed highly unsatisfactory in another. This might be due to cultural differences or to different standards of living that alter expectations for urban design, transportation, other infrastructure, and service provision. Nevertheless, the idea of livability remains a powerful one. In fact, it is the very generality of the term that allows diverse groups of stakeholders to come together and make livability a public policy goal.

## Why Lumanti want to apply?

Lumanti, which was registered as an NGO in 1994, is dedicated to alleviate urban poverty in Nepal through integrated approach of improving shelter conditions and has been working with a vision of creating safe, secured and sustainable communities where people have their rights respected leading to a dignified life. With rapid urbanization in Nepal due to high level of internal migration due to various socio-economic-political factors, systematic urban development is an opportunity as well as a challenge in the context of Nepal. Keeping these realities in mind, Lumanti plans to conduct an assessment on the possibility of piloting “livable city” concept in 3 working municipalities in Chitwan, Bara and Morang. The expectation of Lumanti is to have a field based perspective on the prospect of implementing the concept with active participation of local people and full ownership of municipalities with a long term commitment to make their municipalities livable in line with the idea of livability which includes the ability of a community to meet “the needs of the present without compromising the ability of future generations to meet their own needs”.

### Essential ingredients of livable cities/communities:

- Residents feeling safe, connected and included
- Environmental sustainability
- Access to affordable housing options linked via public transport, walking and cycling infrastructure to employment, education, local shops, public open space and parks, health and community services, leisure and culture

These are needed to promote health and wellbeing in individuals, build communities and support a sustainable community.

### Why to work on the concept of Livability City?

- A livable city respects the living planet, and is in harmony with the natural systems that sustain all life. It uses earth's resources wisely, and meets current needs without compromising the well-being of future generations. It fosters biodiversity – the local communities of animals and plants unique to its place.

Based on the experience of livable city pioneering cities around the world, the following are the key benefits of livable city:

- Bring together all stakeholders into a single platform to achieve the goals of a livable city with a collective vision, aspiration and commitment.
- Promotion of safety and stability linked to the livability of a place.
- Increase prominence and distinct identities of municipalities as major social and economic hub.
- Development of clear and consistent definition of livability that can be objectively measured and tracked over time using indicators that provide an understanding of municipality's strengths and challenges.
- Ownership of all members of the municipality in the development, implementation and measurement of progress against livability indicators.
- Opportunities for people from all sections of the society to live in areas with all the essential ingredients of a livable community.
- Promote the municipality into a place which is a great place to live in terms of resilience, social, economic and environmental advantages.
- Sub-urban and rural communities strive to balance traditional ways of life with the need for access to jobs, health care, and education.

- Cities struggle to revitalize urban centers without displacing existing communities and cultures.
- More and more, people demand a voice in what happens in their communities and an active role in deciding what, where, and how change occurs.
- As urbanization as well as economy grow, rapid growth typically generates additional traffic congestion, land price escalation, rising consumption of goods and services, and the loss of farmland and natural areas to urban expansion.

## Evolution and practices of Livability City Concept

In the late 1950s, livability emerged as a key concept in the rural part of the Netherlands against the background of concerns over rural citizenship. In the 1960s and 1970s, livability was at the core of post-materialist values that rose to prominence in the urban arena. In the 1970s and 1980s livability was also used by urban government to promote a new kind of active citizenship.

In India, the Ease of Living Index (EOL), similar to the concept of Livability, was launched by the government of India in June 2017 with the objective of framing an index to enable a shift to data driven approach in urban planning and management and promote healthy competition among cities. EOL enables cities to build practices that improve the quality of urban living while offering economic growth and sustainability in the long run. The EOL Index is an evaluation tool that reflects the ease of living in Indian cities, examining the impact of urban development programs and the quality of life and economic and social opportunities available to citizens. The EOL Index evaluates development outcomes across four pillars – quality of life, economic ability, sustainability, and citizens’ perception survey – covering 49 indicators examined under 14 categories.

In Nepal’s context, there is massive migration to urban and sub-urban areas from rural areas in search of better life. It has resulted complex urban problems related to employment, housing, water and sanitation, security, health services, good governance and environment. As per 2020 data, there is a growing trend of urbanization in towns and rural areas in Nepal with an increase between 5 and 7 percent each year. This is even more than Kathmandu, with a 4 percent increase every year, and Pokhara, with a growing urbanization rate of 5 percent per year. Rapid urbanization has created different challenges as well as opportunities.

The National Urban Strategy of the government (2017) is aligned with Sustainable Development Goal 11 ("make cities and human settlements inclusive, safe, resilient and sustainable"). The strategy envisages development of infra-structure, promotion of economic activities and easy access of people to government services. However, the key components required for making the upcoming urban/sub-urban cities livable for people under every age group, condition, class and creed seems lacking e.g. sustainable environment, quality of life, participation and ownership of citizens in decision making, good governance, and economic viability and bringing together diverse groups of stakeholders to make livability a goal to achieve collective vision of the people residing in particular place.

## Objectives of the study:

The objective of the study of livable cities are as follows:

- Develop understanding on the concept of Livable City in the local context
- Identify and prioritize aspects of Livable City for implementation in the next 3-5 years
- Strengthen partnership and implement action plan to make the cities livable

## Methodologies

### Literature Review

The study team reviewed existing literatures with focus on practices of livable city within the country, and outside the country to define scope of study and develop study methodologies in local contexts.

### Study Framework Development

The study team developed the overall study methodologies and developed tools for KIIs, FGDs, workshops and consultation meetings.

### Field Based Process:

A study team from Batas Foundation consisting of 4 consultants carried out the field work in 3 municipalities splitting into a group of 2. While the field work and municipality level workshops were carried out simultaneously in Kalaiya and Khairhani in October, while the process was completed in Sundarharaicha in November. Based on the study plan, the team conducted 16 FGDs were organized in Kalaiya, Khairhani and Sundarharaicha among a minimum of 10 community participants in each FGD. These group discussions were represented by children, youths, women, men and senior citizens. Similarly, the team ensured participation in terms of caste, ethnicity, disability, geography, etc. Similarly, the team conducted three Key Informant Interviews with Mayor, FNCCI chairperson, and Municipality PLWD committee coordinator.

**Stakeholder's Workshop:** As a part of the study, the team conducted municipality level workshop for conceptual clarity and visioning of Livability City with a 5-year plan. The workshop was organized jointly by Lumanti and 3 municipalities with participation of key stakeholders as per attached participants' lists. There was a total of 222 participants in 3 municipalities including staff from Lumanti and consultants from Batas Foundation. It is very encouraging that all Mayors/Deputy Mayors and Chief Executive Officers all their municipalities actively participated in group works and throughout the workshop. The workshop was chaired by Mayor or Vice Mayor of respective municipalities. There were presentations from the side of consultants about the

Figure 1: Focus Group Discussion in Khairhani

Figure 2: Stakeholder Workshop in Khairhani Municipality

concept of Livable City and findings of different consultations highlighting the aspirations as well as major problems faced by community people in their day-to-day life. It was followed by visioning exercises on 5 different themes in line with the concept of Livable City where the participants had intense discussion on the change, they would like to see in a 5 years' period and programmatic interventions needed to achieve those collective vision. Respectively thematic leaders presented their group work in plenary for feedback, if any. The workshop was concluded with a strong commitment from respective Mayors/Deputy Mayors to make their municipalities livable.

## **Preparation of Report**

Batas Foundation organized a reflection meeting between assessment teams and Lumanti to have consensus on the contents and structure of final report. Similarly, the team analyzed the data gathered from KIIs, FGDs and multi-stakeholder workshop and grouped in five different thematic categories. Similarly, the team developed key indicators at broad level in alignment of those five different thematic categories.

## **Scope and limitation of the study:**

This study has been conducted to understand the community people's and key municipality stakeholder's understanding about the Livable City concepts and provide them the overview of this concept based on the global and local experiences. Similarly, this study has developed higher-level broader indicators for the different thematic areas. Therefore, this study report will be helpful for Lumanti and respective municipalities to integrate the concept of Livable city in their regular programs and annual planning. Additionally, this report will serve as a guiding document to develop detailed master plan and/or longer term strategy for the municipality stakeholders. However, this report may not work for the purpose of specific and detailed strategic guideline or master plan itself.

Considering the ongoing COVID-19 situation consultations were conducted with limited number of groups and individuals taking COVID safety measures into considerations.

## **Findings**

### **Strength of Municipalities:**

#### **Kalaiya:**

- Kalaiya has produced many national level players like Binod Das, who hails from the city. Kalaiya Cricket Club with a national standard size cricket ground where local children and youths are able to groom themselves as good players.
- Famous Siddheshwar Park and Ram Janaki Temple are situated here.
- Deepsikha Women Cooperative, with share membership of 1080 women and 350 children as saving members, is led by a woman from Dalit community and has played a vital role in socio-economic development of women.
- Famous Barewa Palace is a matter of pride for all Kaliya residents.
- Kalaiya is famous for vegetable production.
- The oldest campus of Bara District, Shri Ram Raja Mohan Bikram Shah Campus has been providing quality education with excellent results continuously for a long time.

- Housing program for low-income group families from marginalized communities is a good example of collaboration between Kalaiya Sub-Metropolitan City, Lumanti, APF, and Build-up Nepal.
- Women are highly organized in terms of economic empowerment, leadership qualities, social mobilization and political awareness being engaged in Lumanti supported programs.
- Citizens have started receiving the services of “Municipality” from their own wards.
- Durga High School, Barewa, Bairiya, has a very good academic performance with adequate infrastructure, library facilities and use of digital technology in education.
- Construction of roads to link every ward with “Municipality” headquarters is going on.
- There are “Municipality” level child and youth networks which are actively engaged in youth and child empowerment.

“Why are there only male bank managers in our “Palika”? Women are as capable as men. We, the children, will convince our parents and raise our voice to the leaders to make our city free from all kind of discriminations. “

***Girl Student, Durga High School, Barewa. Ward # 7. Kalaiva***

## **Khairhani:**

- There are more than 155 industries established within this municipality and more than 60 industries established in ward no 4 alone.
- Municipality is potential for agro-based business as the land is very fertile and there is great potential to market agricultural production in the local market and also in capital city of Kathmandu.
- Rapti River and its tributaries are main source of irrigation.
- There is a great opportunity to develop local tourism spots like Khumroj taking advantage of Chitwan National Park in the south.
- It has the opportunity to provide training and employment opportunities to local youths as a large number of skilled labourers working in the local industries are from India.
- Being at a very central location, the district and the municipality has the added advantage to transport local produces to different parts of the country or bring raw materials used for local industries with good accessibility.

## **Sundarharaicha:**

- Sundarharaicha is regarded as a safe place to live and to do business activities with joint consensus not to support or observe any type of strikes.
- There are beautiful touristic and religious places like Hasina Wetland Area, Brindaban Gaushala, Kichamgadi and Baadhjoda in the municipality.
- Purwanchal University lies in this municipality which has given opportunity for youths of this municipality and all over the country to avail higher education
- The northern part of the municipality is covered by forests which are well conserved through joint cooperation between users’ group and Sub-Division Forest Office.
- Housing program for low-income group families with support from Lumanti has contributed in reaching the most marginalized communities to ensure their basic rights.

- Business community of Sundarharaicha is highly active organized in meeting their social responsibility.
- Modern toilet construction at Biratchowk is a good example of private sector contribution towards for the development of the place.
- Nepal Apanga Mahila Federation has been able to construct a rehabilitation centre for persons with disability and women survivors of different types of violence.
- Two Dalit candidates were successful to pass the exams for the position of ‘Nayab Subba and Section Officer after participating in Public Service Commission preparation class run by Dalit Network.

Nabina, Child Club Leader, making her presentation in Municipality Level Workshop on Livability City.

## Thematic vision/action plan from “Municipality” level workshop, FGD and KIIs - Kalaiya

### 1. Economic Development

Themes	Within a year	Within 3 years	Within 5 years onwards
<b>Economic Development</b>	<b>Sub-theme: Promotion of job opportunities</b>		
	Create employment opportunities with provision of skill development training assuring job placements	Increase investment in agriculture with modernization in agriculture	Establishment of a dairy in each ward
	Easy availability of agricultural inputs to farmers	Provision of agriculture and veterinary technical persons in each ward	
		Increase agriculture production with provision of irrigation canals	
		At least 30 youths from each ward are trained every year with provision of financial and technical support to run their own business enterprises	

Themes	Within a year	Within 3 years	Within 5 years onwards
<b>Economic Development</b>	<b>Sub-theme: Increase in per-capita income</b>		
	Develop saving habits by curtailing expenses on alcohol/tobacco/etc.	Create employment opportunities for jobless youths and increase their income.	Attract tourists by renovating/developing historical monuments of the city.
		Modernization of markets	
		Encourage remittance flow through legal channel and use of remittance in productive sector.	
		Investment in modernization of agriculture for increased income to improve quality of life of farmers	
<b>Economic Development</b>	<b>Sub-theme: Promotion of service sector/tourism</b>		
		Conservation of religious places to promote tourism	Promote Kalaiya as a medical hub
		Promote sports tourism by promoting international standard cricket ground and modern training facilities	Promotion of local tourism

#### Targets (s):

By 2083, at least one member of every family in Kalaiya Municipality are engaged in employment or self-employment activities.
Minimum wage is guaranteed in Municipality as per labor law without any discrimination based on gender, caste, ethnicity, physical abilities.
Each ward provide/facilitate soft loan/subsidy to at least 30 youths every year to start or improve their entrepreneurship

#### Indicators:

- # No of families with at least 1 person employed
- # Daily wage is reasonably enough to afford basic need of the family of 5
- # New and diversified enterprises
- # Access to the formal financial institution specially that of young women

## 1. Infrastructure Development

Themes	Within a year	Within 3 years	Within 5 years onwards
<b>Infrastructure Development</b>	<b>Sub-theme: Development of Public Transportation System</b>		
		Operation of public transportation – solar and electric operated vehicles	Construction of ring road and bypass road
		Disability friendly bus along with provision of separate bus for elderly and women	Wide roads with proper drainage facilities
<b>Physical Infrastructure</b>	<b>Sub-theme: Traffic Management</b>		
	Construction of zebra crossings at strategic locations	Installation of traffic lights operated through solar energy	
	Install hoarding boards at strategic locations with traffic rules with clear display		
<b>Physical Infrastructure</b>	<b>Sub-theme: Public Friendly Infrastructure</b>		
	Construction of road with provision of separate lane for pedestrians/cyclists	Construction of disability friendly toilets	Construction of roads, public buildings, public toilets and parks accessible for wheelchair users, children and senior citizens
	Construction of over bridge at Bharat Chowk	Installation of lights and cameras along the road in line with the concept of safer city	

### Targets (s):

By 2083, public transport system functioning covering all wards of the city.
Traffic management system in place which is friendly and safe for children, people with disability, senior citizens and people in general.
By 2083, all public infrastructure is accessible for people with disability, children and senior citizens.

### Indicators:

- # Road network, which can be used throughout a year, connecting each clusters within RM
- # Efficient and effective traffic management system in place
- # Level of physical accessibility to public buildings

## 2. Access to Services

Themes	Within a year	Within 3 years	Within 5 years onwards
<b>Access to Services</b>	<b>Sub-theme: Good Governance and Transparency</b>		
	Transparency – dissemination of information to public regarding any services/projects implemented by municipality – social audit, public hearing, perception survey	Kalaiya renowned as a model municipality for good governance, inclusive development and optimum use of digital technology in governance	
	Provision of information as per policy provision on right to information		
	Financial public audit and dissemination of information from mass media for promoting transparency		
	Update of citizen charter of all service providing offices		
	Complain box management and action on feedback received		
<b>Access to Services</b>	<b>Sub-theme: Delivery of Services/Inclusive Development</b>		
	Identification of communities deprived from services and delivery of services with priority	Gender inclusive development/behavior/attitudes/policies	
	Equal participation of all groups/communities/sections of society in every phase of project cycle along with decision making process		

	Equal participation and opportunity for everyone to discuss on any agendas directly affecting the people or particular groups		
	Dissemination of vital information in local languages		
	Government services are available without any hassles and bureaucratic hurdles		
	Delivery of services from local institutions, including municipality, without any discrimination		

#### Targets (s):

By 2083, all services available in the Municipality are accessible to every citizen regardless of class, creed, age, ethnicity and geographical location as specified in citizen charter.
Municipality ensures display of project details before project initiation and public audit after the project completion with participation of all stakeholders including Dalits, children, women, marginalized community members and people with disability.
Municipality has digitized vital registrations services, complain mechanism and information dissemination system through hand-held devices accessible for every citizen including people with disability.

#### Indicators:

- # Level of satisfaction among the service seekers in receiving service as outlined in citizen charger
- # Social Audit being a regular feature of the public infrastructure
- # Level of e-governance at the RM and other government establishment

### 3. Quality of Life

Themes	Within 1 year	Within 3 years	Within 5 years and onwards
<b>Quality of Life</b>	<b>Sub-theme: Quality of Health Services</b>		
	General people have easy access to quality health services which is not too expensive	Health services with birthing centres in each ward.	Modernization of Kalaiya Hospital as an international standard medical college
		Establishment of a blood bank and specialized maternity hospital with affordable charges	
<b>Quality of Life</b>	<b>Sub-theme: Quality Education/Higher Education/Technical Education</b>

	Compulsory police patrolling in all wards/toles during the night	Street lights in every part of the municipality	All forms of violence and discriminations against girls and women are ended
		Installation of solar lights and cc camera in all “chowks”	
		Provision of city police in all wards	
		Girls and women feel safe to be out of their homes even before and after daylight.	

**Commitment from group:**

End all forms of social evils like child marriage, dowry, polygamy, child/women trafficking, alcoholism, untouchability and corruption from Kalaiya Sub-metropolitan City by the next five years.

**Targets:**

By 2083, all people have access to basic health services including pre-natal and post-natal services from health institutions within their wards.
By 2083, Municipality has early parenting/stimulation program implemented covering all ECD age children.
All school age children of Municipality have access up to secondary level quality education and vocational education to out of school children.
All women and girls feel safe to move freely in the city even after sunset.

**Indicator(s)**

# Ratio of birth center to population

# Student enrollment in ECD program

# Number of children out of formal education system in KSMC

# The number of incidences of "harassment" or "undesired activities" reported.

**4. Environmental Sustainability:**

Themes	Within 1 year	Within 3 years	Within 5 years and onwards
<b>Environmental Sustainability</b>	<b>Sub-theme: Environment Conservation</b>		
	Effective waste management – classification and recycling of wastes	Conservation of natural resources.	
		Better drains with proper water drainage system	
		Effective mechanism/systems/equipment for pollution control	

		Disaster preparedness through awareness, integration of DRM in planning process, capacity building and response mechanism	
<b>Themes</b>	<b>Within 1 year</b>	<b>Within 3 years</b>	<b>Within 5 years and onwards</b>
<b>Environmental Sustainability</b>	<b>Sub-theme: Natural Resources</b>		
		Efficient management of rivers/streams/water sources	Promote green parks and entertainment centres in each wards
		Conservation and development of public ponds	Embankment walls are constructed to prevent flooding into residential areas
		Conservation of government public land and tree plantation	
		Conserve forests.	
<b>Themes</b>	<b>Within 1 year</b>	<b>Within 3 years</b>	<b>Within 5 years and onwards</b>
<b>Environmental Sustainability</b>	<b>Sub-theme: Clean Energy</b>		
	Encourage families to use electric stove for cooking with provision of induction, heaters at subsidized rates.	Provision of gas stove with cylinder to ultra-poor families at subsidized rates	Install solar energy powered street lamps.
	Support and reward families to install bio gas plans together with animal husbandry		Promote use of electric vehicles with development of infrastructure/charging stations.
	Provision of briquette stove and induction stoves at subsidized rates		

**Targets:**

All households manage degradable wastes within their households and Municipality manage non-degradable wastes in an environmental friendly manner.
By 2083, Municipality has at least __% of total land for open space, public places, parks and conservation area.
Municipality has separate areas allocated for residential, farming, industries, waste management and public office purposes.
Every household use at least one alternative option to promote clean energy.

**Indicator(s):**

# No. of houses without proper waste disposal system / # number of house using home-made compost

# % of total land are dedicated as "open spaces which is accessible to all"

# Dedicated entrustment and deployment of officials for environmental safety

# Number or % of house using alternative energy

## Thematic vision/action plan from “Municipality” level workshop, FGD and KIIs – Khairahani

### 1. Economic Development

Themes	Within a year	Within 3 years	Within 5 years
<b>Economic Development</b>	<b>Sub-theme: Increase in per-capita income</b>		
	Develop saving habits by curtailing expenses on alcohol/tobacco/etc.	Create employment opportunities for jobless youths and increase their income.	Attract tourists by renovating/developing historical monuments of the city.
		Modernization of markets

		All schools, toilets and offices are disability friendly.	A city which is disability friendly in terms of physical structures, attitude, behaviour and access to services
		Provision of separate cycle lane and safe pedestal lane to reduce accidents.	

#### Targets (s):

By 2083, public transport system functioning covering all wards of the city.
Traffic management system in place which is friendly and safe for children, people with disability, senior citizens and people in general.
By 2083, all public infrastructure are accessible for people with disability, children and senior citizens.

#### Indicators:

# Road network, which can be used throughout a year, connecting each clusters within RM

# Efficient and effective traffic management system in place

# Level of physical accessibility to public buildings

### 5. Access to Services:

Themes	Within a year	Within 3 years	Within 5 years onwards
Access to services		Sub-theme: Good Governance and Inclusion:	
			Build an inclusive society where people with disability have equal access to services guaranteeing the rights granted by the constitution of Nepal (Article 42, sub-article 3)
Access to services		Sub-theme: Transparency:	

		Persons with disability have equal opportunity to social, political, economic and educational services which are transparent	
<b>Access to services</b>		<b>Sub-theme: Equal participation in decision making process</b>	
		Equal participation of persons with disability in decision making process along with project implementation, monitoring, evaluation, etc. as persons without disability.	
<b>Access to services</b>		<b>Sub-theme: Access to information:</b>	
	Provision of Help Desk in every office	Persons with disability have access to their rights including early detection, treatment and rehabilitation services	
		Provision of interpreter through sign language	
		Provision of help desk for dissemination of quality information from Tole, ward up to Municipality level	
<b>Access to services</b>		<b>Sub-theme: Inclusion</b>	
	Dissemination of fact based information	Dignified inclusion of people from marginalized communities in every phase of program implementation (health, education, employment, political participation, physical infrastructure, etc.)	
		Hearing and addressing the issues and rights of persons with disability	

#### Targets (s):

By 2083, all services available in the municipality are accessible to every citizen regardless of class, creed, age, ethnicity and geographical location as specified in citizen charter.
Municipality ensures display of project details before project initiation and public audit after the project completion with participation of all stakeholders including Dalits, children, women, marginalized community members and people with disability.
Municipality has digitized vital registrations services, complain mechanism and information dissemination system through hand-held devices accessible for every citizen including people with disability.

#### Indicators:

# Level of satisfaction among the service seekers in receiving service as outlined in citizen charger

# Social Audit being a regular feature of the public infrastructure

# Level of e-governance at the RM and other government establishment

## Overall Recommendations: - All Municipalities

- Lumanti can facilitate municipality to incorporate the findings and recommendations of this report in their municipal periodic plan.
- Municipality should integrate the plans for Livable city with annual planning process every year.
- Lumanti should implement community awareness raising/advocacy programs to ensure participation of community people including women, PLWDs, marginalized groups in annual planning process to take forward the agenda of Livable City.
- Municipality should initiate dialogue with federal and provincial government for resource leveraging to develop Khairahani as a Livable City.
- Lumanti should align its programs to contribute in achieving the goals of Livable City.

01:45 -02:00	Closing Remarks	Mayor

## ANNEX B: FGD and KII Questionnaire

### FGD Group/KII Details Kalaiya-Bara, Khairhani-Chitwan & Sundarharaicha-Morang October/November, 2021

S.N.	Groups	# of consultations	Remarks
1	Children's Group (mixed) 12-18 years	1	1 hour including travel time.
2	Youth group (mixed) 19-24 years	1	1 hour including travel time.
3	Women Cooperative Members	1	1 hour including travel time.
4	Men's group	1	1 hour including travel time.
5	Senior Citizen's Group	1	1 hour including travel time.
	Total	5	FGDs/Consultations to be organized in different wards also considering the participation of different ethnic groups.

### KII Details

S.N.	Key Informants	# of interviews	Remarks
1	Mayor or Deputy Mayor	1	45 Minutes including travel time.
2	FNCCI Chairperson/representatives	1	45 Minutes including travel time.
3	Chief of Municipality Planning Unit	1	45 Minutes including travel time.
	<b>Total</b>	<b>3</b>	

Kalaiya (Bara), Khairhani (Chitwan) and Sundarharaicha (Morang)

### Focus Group Discussion Questionnaire

#### बिषय केन्द्रित समुह छलफल-प्रश्नावली

##### FGD-Children:

1. यस पालिका, वडा अथवा समूहको हामी सबैले आहा!! भन्ने उपलब्धिहरु के हुन्?
2. यस ठाउँको बिशेष पहिचान कुन कुरालाई मान्नु हुन्छ? यस क्षेत्रका गौरव गर्ने कुराहरु के के छन्?
3. समग्र रुपमा बालबालिकाको अवस्था कस्तो छ? ५ लाई राम्रो र १ लाई तल्लो स्तर मान्दा हालको स्थिति लाई कुन स्तरमा राख्नु हुन्छ अनि किन?
4. बालबालिकाले सामना गर्नु परेको प्रमुख समस्याहरु के के हुन्? त्यसमा पनि बालिकाका प्रमुख समस्याहरु के के हुन्? बालबालिकाहरुको लागि अबको ५ वर्षको समय भित्र यो पालिका बालबालिका का निम्ति बस्न योग्य बनाउन कस्तो परिवर्तन भएको हेर्न चाहनु हुन्छ? (शिक्षा, स्वस्थ, सुरक्षा, शीप, सहभागिता, बालबालिकालाई सामान व्यवहार/अवसर, आदि)
5. तपाईंहरुले हेर्न चाहनुभएको परिवर्तन प्राप्त गर्न के कस्ता प्रयास/योजनाहरु गरिनु पर्छ?
6. यस ठाउँको बिकासकोलागि लुमन्तीले बिशेष गरी बालबालिकाहरुमा केन्द्रित के कस्ता कामहरु गरिरहेको छ? यस संस्थाको राम्रो लागेको पक्ष साथै सुधार गर्नु पर्ने कुराहरु के के देख्नु भएको छ?
7. तपाईंहरुले हेर्न चाहनुभएको अवस्थामा पुग्नको निम्ति बालबालिका/किशोर किशोरी र बाल/युवा संजाल आदिको कस्तो भूमिका हुनु पर्छ/हुनेछ?

##### FGD-Youth:

1. यस पालिका, वडा अथवा समूहको हामी सबैले आहा!! भन्ने उपलब्धिहरु के हुन्?
2. यस ठाउँको बिशेष पहिचान कुन कुरालाई मान्नु हुन्छ? यस क्षेत्रका गौरव गर्ने कुराहरु के के छन्?
3. समग्र रुपमा युवाहरुको अवस्था कस्तो छ? ५ लाई राम्रो र १ लाई तल्लो स्तर मान्दा हालको स्थिति लाई कुन स्तरमा राख्नु हुन्छ अनि किन?

4. युवाहरुले सामना गर्नु परको प्रमुख समस्याहरु के के हुन्? त्यसमा पनि युवा महिलाका प्रमुख समस्याहरु के के हुन्?
5. युवाहरुले अबको ५ वर्षको समय भित्र युवाहरुका निम्ति बस्न योग्य बनाउन कस्तो परिवर्तन भएको हेर्न चाहनु हुन्छ? कस्तो परिवर्तन भएको हेर्न चाहनु हुन्छ? (शिक्षा, स्वस्थ, सुरक्षा, शीप, सहभागिता, सामान व्यवहार/अवसर, आदि)
6. तपाईंहरुले हेर्न चाहनुभएको परिवर्तन प्राप्त गर्न के कस्ता प्रयास/योजनाहरु गरिनु पर्छ?
7. यस ठाउँको बिकाशकोलागि लुमन्तीले के कस्ता कामहरु गरिरहेको छ? यस संस्थाको राम्रो लागेको पक्ष साथै सुधार गर्नु पर्ने कुराहरु के के देख्नु भएको छ?
8. तपाईंहरुले हेर्न चाहनुभएको अवस्थामा पुग्नको निम्ति युवा वर्ग/युवा क्लब, युवा संजाल आदिको कस्तो भूमिका हुनु पर्छ/हुनेछ?

### FGD-Women:

1. यस पालिका, वडा अथवा समूहको हामी सबैले आहा!! भन्ने उपलब्धिहरु के हुन्?
2. यस ठाउँको बिशेष पहिचान कुन कुरालाई मान्नु हुन्छ? यस क्षेत्रका गौरव गर्ने कुराहरु के के छन्?
3. यस पालिकामा समग्र रुपमा महिलाहरुको अवस्था कस्तो छ? ५ लाई राम्रो र १ लाई तल्लो स्तर मान्दा हालको स्थिति लाई कुन स्तरमा राख्नु हुन्छ अनि किन?
4. महिलाहरुले सामना गर्नु परको प्रमुख समस्याहरु के के हुन्? त्यसमा पनि युवा महिलाका प्रमुख समस्याहरु के के हुन्?
5. महिलाहरुले यस पालिकालाई अबको ५ वर्षको समय भित्र महिला, किशोरी र बालबालिका मैत्री, त्यस भित्र पनि बालिका/किशोरी मैत्री बनाउन कस्तो परिवर्तन भएको हेर्न चाहनु हुन्छ? (शिक्षा, स्वस्थ, सुरक्षा, महिला शसक्तीकरण, शीप, आर्थिक स्वावलम्बन, सहभागिता, सामान व्यवहार/अवसर, आदि)
6. घर परिवार, समुदाय तथा स्थानिय तहमा लिइने प्रमुख निर्णयहरुमा महिलाहरुको भूमिका कस्तो छ?
7. तपाईंहरुले हेर्न चाहनुभएको परिवर्तन प्राप्त गर्न के कस्ता प्रयास/योजनाहरु गरिनु पर्छ?
8. लुमन्तीले यस ठाउँको बिकाशकोलागि, त्यस मध्ये पनि महिलाहरुको सशक्तिकरणकोलागि, के कस्ता कामहरु गरिरहेको छ? यस संस्थाको राम्रो लागेको पक्ष साथै सुधार गर्नु पर्ने कुराहरु के के देख्नु भएको छ?
9. तपाईंहरुले चाहनु भएको अवस्थामा पुग्नको निम्ति महिलावर्ग/संजाल, युवा, किशोर किशोरी आदिको कस्तो भूमिका हुनु पर्छ/हुनेछ?

## FGD-Men:

1. यस पालिका, वडा अथवा समूहको हामी सबैले “आहा!!” भन्ने उपलब्धिहरु के हुन्?
2. यस ठाउँको बिशेष पहिचान कुन कुरालाई मान्नु हुन्छ? यस क्षेत्रका गौरव गर्ने कुराहरु के के छन्?
3. समग्र रुपमा पुरुषहरुको अवस्था, त्यस मध्ये पनि युवाहरुको अवस्था, कस्तो छ? ५ लाई राम्रो र १ लाई तल्लो स्तर मान्दा हालको स्थिति लाई कुन स्तरमा राख्नु हुन्छ अनि किन?
4. यस पालिकामा यहाँका जनताले सामना गर्नु परेका प्रमुख समस्याहरु के के हुन्? त्यसमा पनि महिला, युवा, बालबालिका, ज्येष्ठ नागरिकहरुका प्रमुख समस्याहरु के के हुन्?
